.Alumno Carlos Martinec Bautista

```java
Public static Void main (String [] args){
    for(int x=0; x<3; x++){
        for(y=0; y<2; y++){
            System.Out.println("La y"+ yea (Y-1));
        }
        System.Out.println("La x"+ yea (x-1));
    }
}

Public static int yea(int n){
    if(n==1){
        System.out.println("NO");
        return n*1;
    }else{
        System.Out.println("S 1"+(n-1));
        return n*2;
    }
}
```

variables y Cambios

Iteración 1:

x=0;
y=0;1,2;
n=-1;0,-1;

Iteración 2:

x=0;
Y=0;
n=-;

OUTPUTS:

S1 -2
La Y-2
S1 -1
La Y 0
S1 -2
La x -2
